

Lowest temperatures in the industry without the freeze-ups

- Fully enclosed system provides protection from outside contamination
- Factory insulated and jacketed ensures maximum efficiency
- Simple clean-in-place system makes sanitation easy
- Simple, easy-to-use controls monitor temperatures and settings
- Clamp-on return bends allow full access for cleaning and inspection
- Chiller is equipped with easily operated hand expansion/liquid solenoid valve with single stage modulating evaporator pressure regulator
- Bottom to top giblet feed ensures complete liquid draining to virtually eliminate product waste
- Stainless steel supports allow for easy, secure mounting to floor or ceiling
- ASME stamp certifies heat exchanger meets or exceeds industry standards

Morris chilling devices provide superior control of temperature and moisture in poultry.

Note: All controls and valves shown above are furnished by Morris & Associates. Ammonia piping and fittings are supplied by the purchaser
